

Cyber Traders

Algorithmic Trading

cybertraders.io

During the trading year 2024, our team earned **129%**.

The results of tests taken in 2022 and 2023 outperformed those from 2024 by a significant margin.

Our Algorithm

This is an entirely innovative proprietary project that has the potential to change the investment world.

We invested all our programming knowledge into its creation, combining the efforts of professional traders and managers. The result is a unique algorithm.

01

Serious work was done testing thousands of different strategies.

02

We meticulously analysed hundreds of charts, studying numerous patterns and trends.

03

We integrated all of this into an algorithm that ensures efficiency and reliability.

Just the Numbers

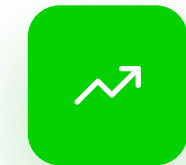

145%.

average annual profit for the
last 33 months.

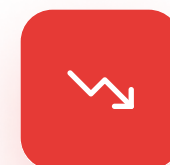

129%.

real annual profit for
the year 2024

-12%.

largest monthly decline in the
entire 39-month period.

+35%.

Initial deposit is individual

**You are not losing anything and
have the opportunity to verify the
reality of such earnings.**

It is safe

All strategy tests have been conducted since 1 January 2021, meaning over 3 years of in-depth analysis to select the ideal strategies.

The creation of this product is carried out by a team of qualified traders and software developers based on **data analysis collected over 7 years**, using bespoke software code that has been written and **refined over the last 2 years**.

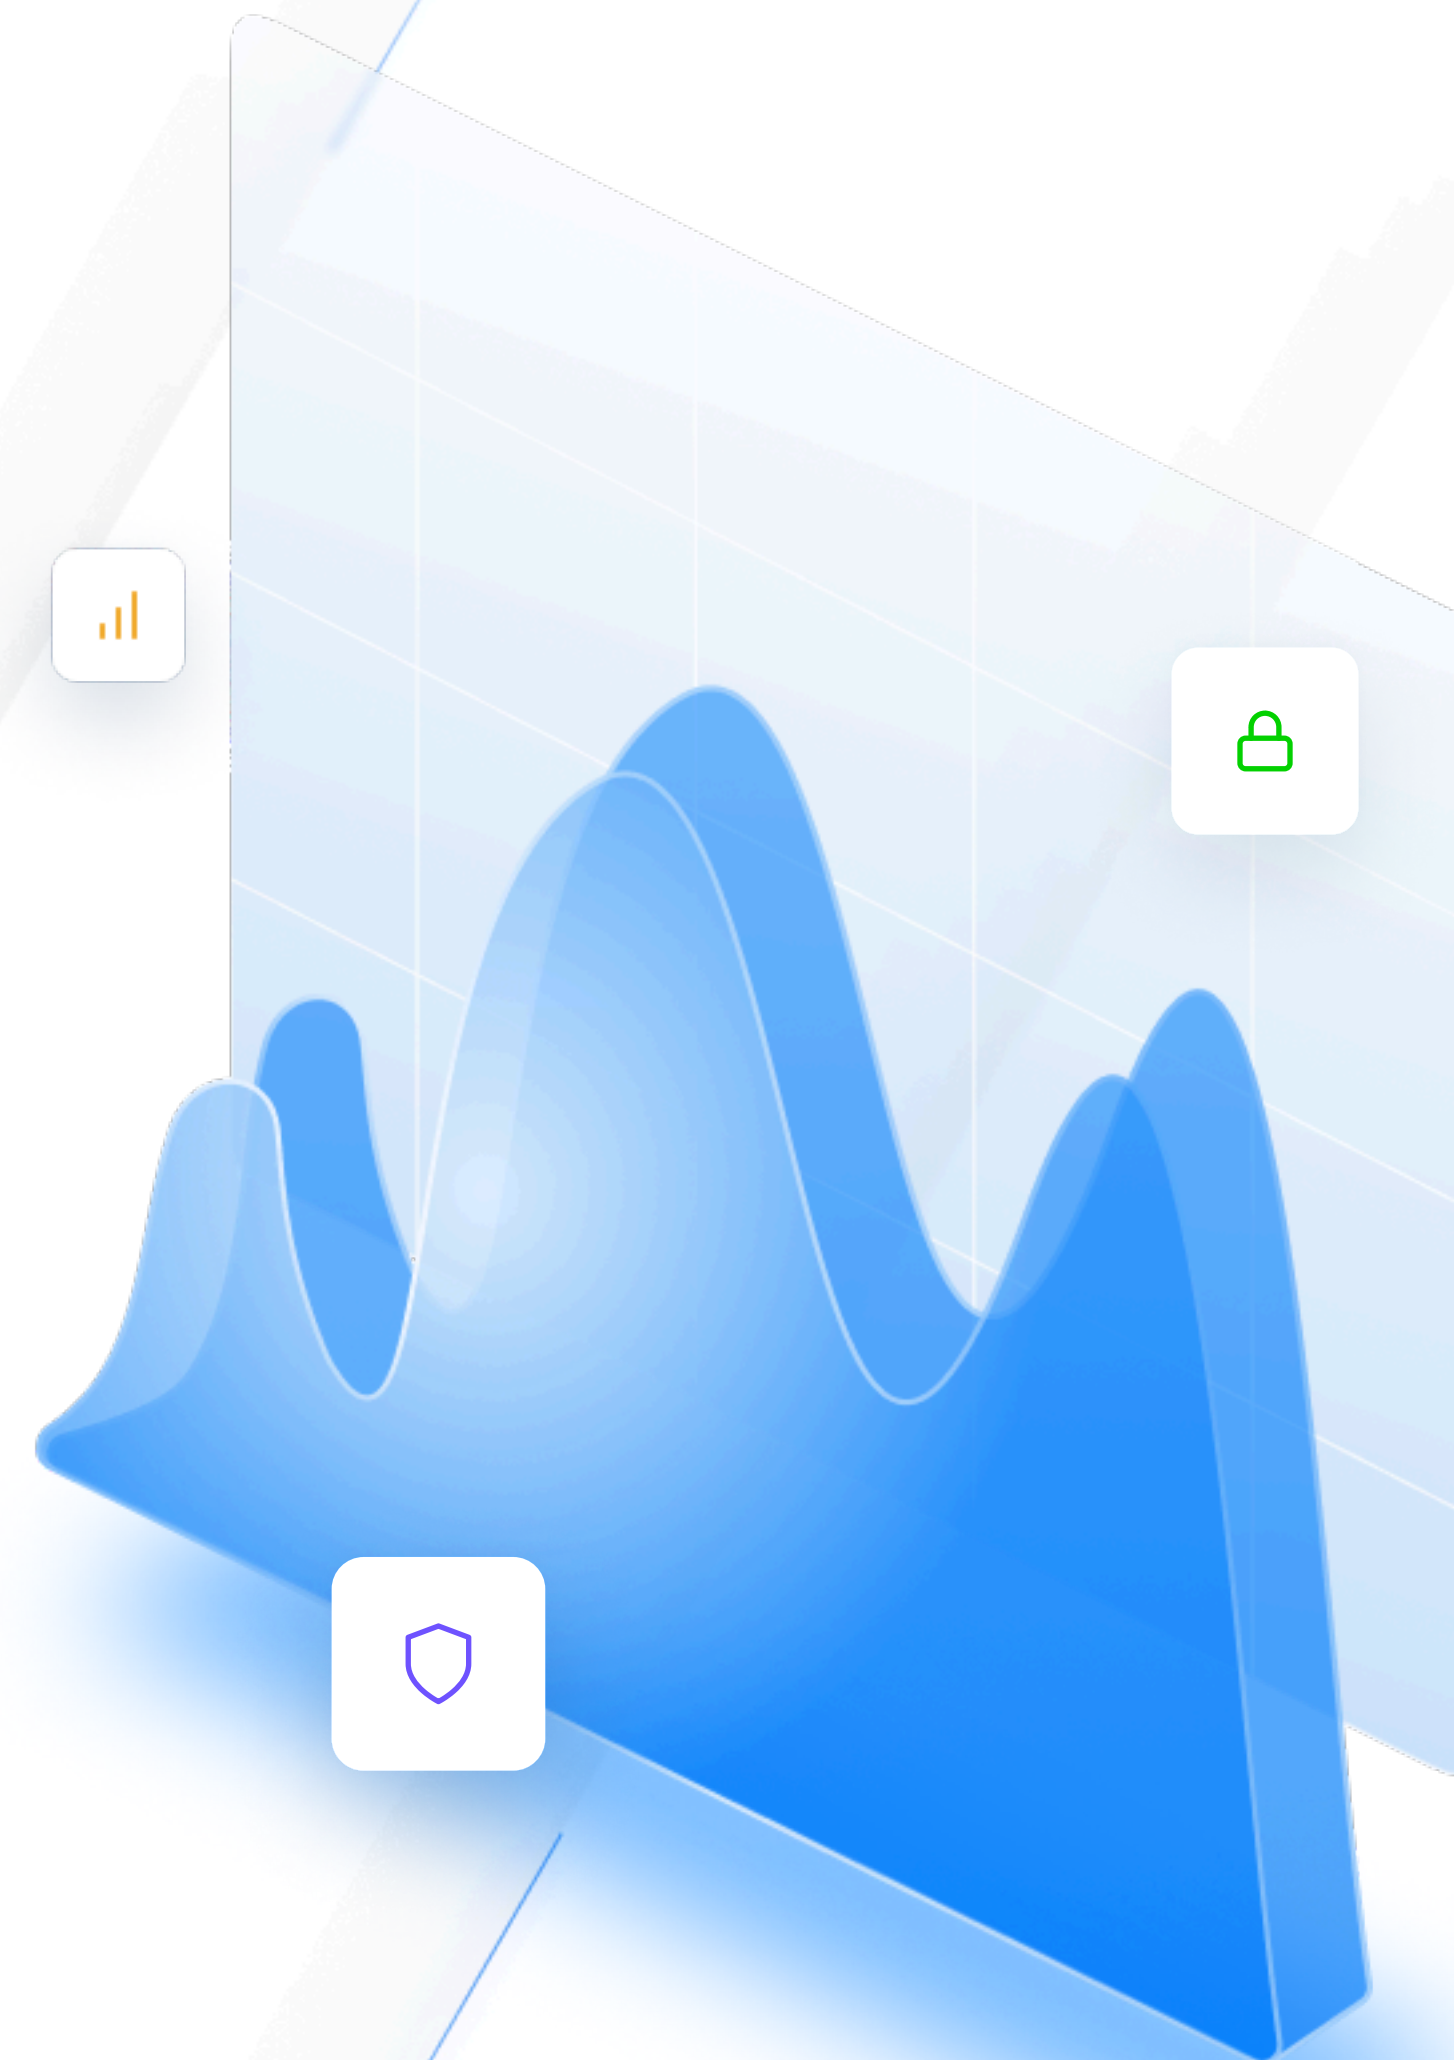

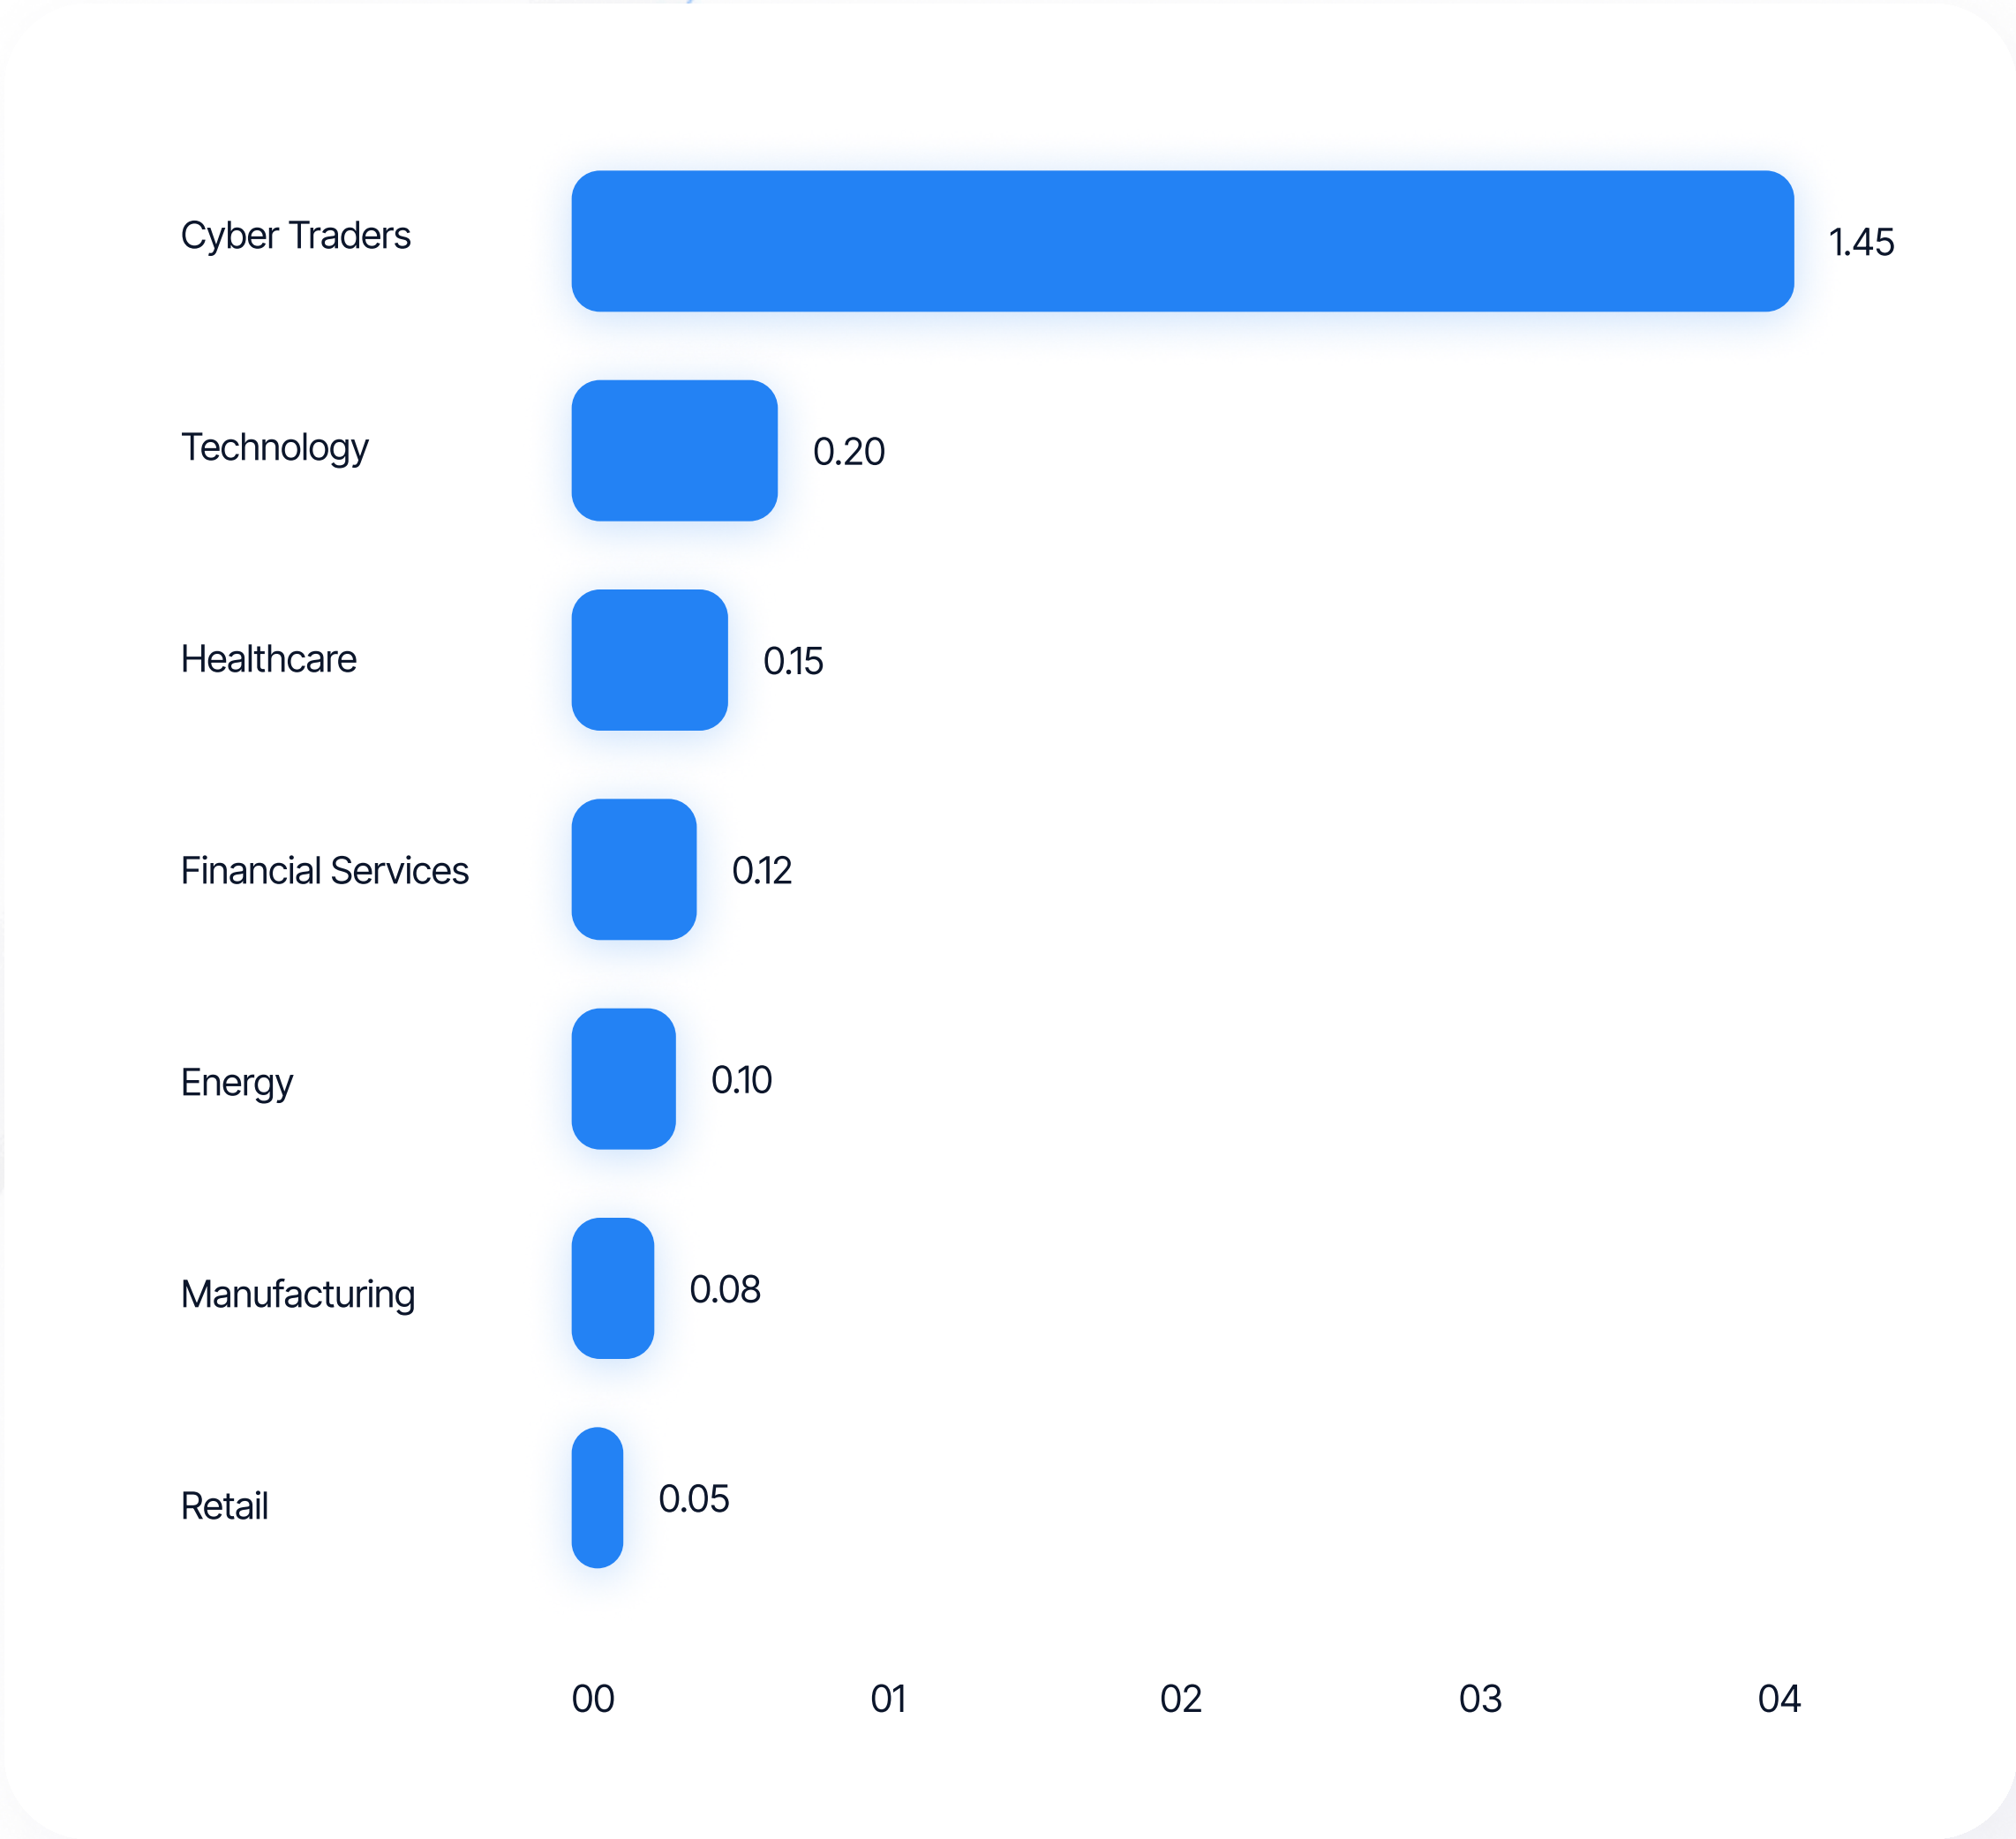

Chart Analytics

Maximum annual return rates for investments in various sectors from 2010 to 2020, including our crypto sector.

You can see the approximate average annual return for each sector in the table.

145% is the average annual profit from 2021 to 2024

What We Need

Each strategy has a maximum liquidity per trade of **\$40,000**.

Considering that our algorithm currently has 20 active strategies, the total investment required for the product to function is **\$800,000**.

We have already raised nearly 50% of the amount, so we only need to attract **\$500,000**.

We have certainly noted the maximum amount with which our algorithm can operate to ensure market stability and not disrupt its balance.

What We Offer

75-80% annually.
This is approximately

60% net profit for
the investor.

Initial deposit
is individual

**We are confident that this algorithm
opens new horizons in the world of
investments and are ready to share
its potential with you.**
